Kurzprofil (Professional Summary)

Frontend Developer with 5.6 years of experience building and scaling high-performance web applications using React.js, TypeScript, Next.js, and Micro-frontends. Strong background in system design, REST APIs, real-time data handling, and state management. Proven expertise in application performance optimization, ensuring cross-browser compatibility, and delivering maintainable code in Agile environments.

Berufserfahrung (Work Experience)

01/2026 – Present | Front-End Developer | Metaplore (Electronic Arts)

Location: Hyderabad, India

- **07/2026 – Present: Project: Loyalty Contentful Hub (SDK App)**
 - A custom Contentful SDK application for EA's loyalty platform enabling business teams to configure and manage content models for reward programs.
 - Developed custom UI extensions and interactive forms using Contentful SDK, Next.js, and TypeScript.
 - Created configuration modules for landing and reward pages, streamlining content type schema creation.
 - Implemented role-based access control (RBAC) through tags to secure user permissions.
- **03/2026 – 07/2026: Project: EA MVP+ Membership Platform**
 - Scalable Next.js web application handling cross-franchise digital rewards, early access incentives, and bundle subscriptions.
 - Architected a dynamic nested routing layout with Next.js to programmatically resolve hierarchies.
 - Engineered optimized global/local state management with REST API synchronization.
 - Implemented Micro-frontend architecture via Module Federation and deep performance optimization (memoization, lazy loading).
- **01/2026 – 03/2026: Project: Game Stats Platform – FC26**
 - Player statistics application tracking gameplay performance via interactive graphical charts.
 - Implemented graphical data visualization using Recharts to track win ratios and match statistics.
 - Built shareable snapshot functionality enabling users to download PNG images of their statistics.
 - Wrote unit tests using Jest and performed mutation testing with Stryker, achieving 100% test coverage.

10/2025 – 12/2025 | Front-End Developer | Amphora Software

Location: Hyderabad, India

- **Project: Symphony Trade-Capture**
 - Amphora ETRM platform module for real-time energy commodity trade management.
 - Built dynamic, responsive forms using TanStack Form with field-level validation and optimized state handling.

- Integrated GraphQL APIs for efficient schema-based communication to fetch and submit trade data.
- Developed reusable components and enforced reliability through unit testing with Jest and React Testing Library.

04/2021 – 10/2025 | Front-End Developer | Techwave

Location: Hyderabad, India

- **10/2023 – 10/2025: Project: UGL CMS (Condition Monitex System)**
 - Australian software system assisting Help Desk staff in monitoring live train asset conditions.
 - Built interactive dashboards and high-volume data visualizations (heatmaps, spline area graphs) using Highcharts and React.js.
 - Enabled real-time updates using Microsoft SignalR to improve live tracking.
 - Applied Atomic Design principles to build a structured Fluent UI component library and managed state using Redux and Redux-Saga.
- **01/2022 – 09/2023: Project: UGL PMS**
 - Cloud-hosted web application built to streamline asset performance and service monitoring with SAP integration.
 - Spearheaded key application features including Maintenance Schedule module, SAP integration, and automated report exports.
 - Configured CI/CD automation and deployments using Azure DevOps to enhance release cycle efficiency.
- **04/2021 – 12/2021: Project: Aman Travels**
 - Multilingual application for global travel booking and services.
 - Developed scalable UI components using React and Ant Design.
 - Optimized frontend performance utilizing code-splitting and caching techniques, and integrated GraphQL APIs.

Bildungsweg (Education)

08/2015 – 05/2019 | Bachelor of Technology (B.Tech)

Jawaharlal Nehru Technological University, Kakinada, India

IT-Kenntnisse (Technical Skills)

- **Frontend Engineering:** React.js, Next.js (SSR/SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Fluent UI, Bootstrap
- **Architecture & State:** Micro-frontends, Module Federation, Atomic Design, Component-Based Architecture, Redux, Redux Toolkit, Redux-Saga, Context API
- **APIs & Data:** REST APIs, GraphQL, Microsoft SignalR, JWT Authentication, Contentful SDK, Highcharts, Recharts
- **Testing & DevOps:** Jest, React Testing Library, Stryker, Unit Testing, Git, GitHub, Azure DevOps, CI/CD, npm, pnpm
- **AI-Assisted Dev:** GitHub Copilot, ChatGPT, Cursor AI, Claude AI, Prompt Engineering

Sprachkenntnisse (Language Skills)

- **Telugu:** Native (Muttersprache)
- **English:** C1 (Business Fluent / Verhandlungssicher)

Hyderabad, 29.09.2026
